

Use this quick guide when sending the calculator package by email.

1) Download and save the ZIP file

1. Download the attached ZIP file from email.
2. Save it to a location you can find easily (for example, Desktop or Documents).

2) Unzip the package

1. Right-click the ZIP file.
2. Select **\*\*Extract All...\*\*** (Windows) or your system's unzip option.
3. Choose a destination folder.
4. Open the extracted folder when complete.

3) Start a calculator

1. Open the extracted package folder.
2. Open the calculator you want (for example: Load Calc Basic, Load Calc Pro, Consumables Calc, Medicines Calc).
3. Double-click the calculator's 'index.html' file.
4. The calculator should open in your default browser.

4) If double-click does not open correctly

1. Right-click 'index.html'.
2. Choose **\*\*Open with\*\***.
3. Select a modern browser (Edge, Chrome, or Firefox).

5) Save, export, and share

- Scenario saves are local to that browser on that device.
- Use each calculator's **\*\*Export\*\*** function to create a file for backup/sharing.

6) Important note

These tools are planning estimators. Final technical decisions should be verified by qualified personnel.
